

Deal or No Deal – Howie Mandel Does Downtown

Overview

Inspired by the ever-popular game show Deal or No Deal, this game allows the player to assume the identity of Howie Mandel in a comic-like adventure game on mobile platforms. People who enjoy the game show will be able to play Deal or No Deal on the go.

Gameplay

Howie Mandel Does Downtown is an adventure game playable on the mobile platform. As Howie Mandel, the player comes into contact with the show's models in a series of events on his way to the studio.

Along with the inclusion of Howie and the models, this game also provides the same color scheme and music represented in the show. The number pad provides the ability to input the direction Howie walks, which envelopes to give away, view monetary amounts, and accept or decline the employer's deal.

The players begin by choosing a briefcase and receiving a package of envelopes that contain checks with assorted money values. As Howie travels to the studio, he finds himself in a series of random, humorous occurrences involving models from the show (Figure 1).

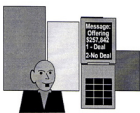

Figure 2

During each encounter with the models, Howie is required to forfeit envelopes to them. In return, Howie is awarded with a necessary service needed before arriving to the studio. Howie's employer acts as the banker, offering him a deal after each encounter (Figure 2). The player must decide if he should take the deal or continue toward the studio in hopes of gaining more money.

In order to promote competition, there is a high score rating system world wide. Players will be ranked in their lifetime score, the number of games they have played, and the number of times they have obtained a million dollars.
